INDEX

Page numbers of regular articles are given in boldface type

ABRAHAMSON, S., 574
Abstracts of papers presented at the 1955 meetings of the Genetics Society of America, 563
Aegilops, induced gene transfer from, to Triticum, 595
Agropyron trachycaulum and *Hordeum jubatum* hybrids, cytogenetics of, **539**
ALLEN, SALLY LYMAN, linkage in the mouse, **627**
Allium cepa, kojic acid derivative effects on, 600
ALTENBURG, LUOLIN S., 563
amino acids, *Paramecium aurelia*, 565
ANDERSON, E. G., translocations, maize chromosome 4, **500**
translocations, maize chromosome 6, **531**
ANDERSON, LULU F., 563
ANDERSON, RUTH S., 576
aneuploidy, *Paramecium aurelia*, 579
role in competition with complete nuclei, *P. aurelia*, **878**
anthocyanin synthesis in maize, 568
antigens, cattle, effect of enzymes on, 599
ciliary, *P. aurelia*, 572
linkage, chickens, 594
ARNDT, WILLIAM F., 566
ATWOOD, K. C., 563, 564
nuclear distribution, Neurospora heterokaryons, **438**
autotetraploid white clover, incompatibility in, dominance and double reduction, **137**

Bacillus megaterium, metabolic and division synchronism, 595
synchronization of nuclear and cytoplasmic division, 569
bacteria, spontaneous mutation, in nondividing, **726**
bacteriophage, DNA and protein synthesis, 584
lysogenicity and immunity to, 583
lysogeny, 582
barley, resistance to mildew, Black Russian variety of, **421**
X-irradiated seed, storage effect, 588
X-ray dose-effect in embryo, 585
BAUGHMAN, R. D., 576
BEATTY, ALVIN V., 564
BECKER, W., 564
bison, blood types in, 586
blood group factors, rabbit, **770**
blood types, bison, 586
body size in mice, genetics of, 566
BONNER, D. M., 600, 602
tryptophan synthetase formation, *Neurospora crassa*, **761**
BOYLE, W. S., cytogenetics, *Agropyron trachycaulum* and *Hordeum jubatum* hybrids, **539**
BREWBAKER, JAMES L., incompatibility, autotetraploid white clover, dominance and double reduction, **137**
BRIGGS, F. N., resistance to mildew, Black Russian barley, **421**
Bromus, interspecific hybrids in, **175**
BROWN, SPENCER W., chiasmata and crossing over, *Lilium formosanum*, **850**
BRYAN, JOHN H. D., 564
BUTLER, L., 565
BUTZEL, H. M., JR., 565
mating type, variety, 1, *P. aurelia*, **321**

CALDECOTT, RICHARD S., 565
CALE, GLADSTONE H., JR., 566
CARLSON, E. A., 587
carnation, gamma-ray induced mutation, 584
William Sim, genetic variants of, 588
carotenoids, tomato, apricot, 577
tomato varieties, **715**
CASPAR, A. L., 595
CASPARI, ERNST, 566
CASPARI, SARAH, 602
cattle, enzyme effects on antigen activity in, 599
CAUGHEY, PATRICIA A., mating type potentialities, *Tetrahymena pyriformis*, **668**
nuclear instability, Tetrahymena, **388**
CHAI, C. K., 566
CHAO, P. K., 567
CHAPLIN, C. E., 577
chemical mutagenesis, *Drosophila melanogaster*, **76**, 574
Neurospora crassa, **726**
chiasmata and crossing over, *Lilium formosanum*, **850**
pericentric inversion, maize, **874**
Chlamydomonas, non-Mendelian inheritance in, 594
reinhardi, genetics of, **476**
chromatid abberrations, Tradescantia, 563
X-ray and gamma-ray in air and nitrogen, *T. paludosa*, **193**
chromosomal adaptive polymorphism, *D. persimilis*, 597
chromosome abberrations, action of oxygen, 568
cation effects on calcium deficient Tradescantia, 598
induced, maize, 571
Tradescantia, 579
chromosome homology in Streptopelia spp., 598
chromosome structure, cations in, 582
chromosomes, accessory, in fowl, 587
lampbrush, electron microscopy of, 579
CHU, ERNEST H. Y., 567
CLANCY, C. W., 567
clover, white, incompatibility in autotetraploid, dominance and double reduction, **137**
coat color, temperature effects on, guinea pig, **90**

COATNEY, G. ROBERT, resistance to malaria, mice, **620**
COE, E. H., 568
COHEN, CARL, blood group factors, rabbit, **770**
colchicine, chimeras in flax, 569
  sensitivity, tumor chromosomes, 603
COMSTOCK, R. E., genetic variances, open pollinated corn, **45**
CONGER, ALAN D., 568
correlations between relatives, inbred populations, **681**
  random mating populations, **153**
  variance components, symmetrical random mating populations, **310**
CRAIG, DORIS L., 568, 579
CRARY, D. D., 569
Cricetulus griseus (Chinese hamster), colchicine sensitivity, tumor chromosomes of, 603
crossing over, attached-X chromosomes, *D. melanogaster*, 601, **918**
  and chiasmata, *Lilium formosanum*, **850**
  variable, *D. pseudoobscura*, **399**
cytology, genome analysis in Gossypium, **214**
cytoplasmic male sterility, maize, fertility restoration, 570, 571

Dactylis, irradiation induced sterility in hybrids, 598
DELAMATER, E. D., 569, 595
DENT, J. N., 568
DESCHNER, ELEANOR, chromosome sensitivity to X-ray and thermal neutrons, *Trillium erectum*, **460**
DIMINNO, R. L., 588
DIRKS, V. A., 569
DNA transfer and recombination in *Escherichia coli*, 596
DOBZHANSKY, TH., deleterious recessives, *D. pseudoobscura* populations, **781**
  developmental homeostasis, natural populations, *D. pseudoobscura*, **797**
DOLLINGER, E. J., 570
dominance and double reduction, autotetraploid white clover incompatibility, **137**
DOUGLAS, H. C., 592
Drosophila, chromosome reunion, X-irradiated sperm of, **692**
  genetic segregation, translocation heterozygote in, **809**
  heterozygote frequencies, populations of, **444**
  melanogaster, antimetabolite and ultraviolet synergism in, 585
    brown-dominant position effect in, **246**
    chemical mutagenesis, **76**, 574
    chromosome, unstable ring, 575, **951**
    competition, Curly abnormalities and their wild type homologues, laboratory populations of, **331**
    copper metabolism in mutants of, 590
    crossing over, attached-X chromosomes, 601, **918**
    cubitus interruptus, temperature effect in, 576
    deficiencies and minutes, induced, in oocytes and sperm of, **281**
    deficiency induced abnormalities in, 601
    development of Minutes, 571
    gamma radiation LD_{50} in, 577
    gamma-ray mutation in, 576
    gonadal pigment analysis in, 572, 573
    induced dominant lethals in, 571
    irradiation induced sex-linked lethals, 570
    isoalleles, yellow locus in, **374**
    mutagenic effects of formaldehyde in, 578
    mutation rate, non-effect of photoreactivating light on, 563
    neurological effects of a head-mutant in, 575
    neutron, thermal, induced sex-linked lethals in, **490**
    nucleic acid metabolism in, 600
    oxygen and hydrogen peroxide effects on a gene and tumor induction in, **268**
    peritrophic membrane formation, 592
    position effect, 567, 585
      brown locus, **5**
      cubitus interruptus, **343**
      V-type, white locus, **739**
    spermatogonial exchange, X and Y chromosomes, **24**
    spiracular glands in, 592
    translocations and inversion, induced, oocytes and sperm of, **252**
    tyrosinase activity in, 582
    ultraviolet absorption in salivary chromosomes of, 593
    urethane induced mutations in, 588
    X-radiation, 574
  multi-locus nature of dumpy, 587
  nutritional requirement in, **224**
  origin of irradiation induced dominant lethals, 589
  persimilis, chromosomal adaptive polymorphism in, 597
  pseudoobscura, deleterious recessives in populations of, **781**
    developmental homeostasis, natural populations of, **797**
    heterosis in, **832**
    variable crossing over in, **399**
  sperm utilization, mustard treated, 594
  willistoni, genetic modification of temperature sensitive lethal in, **130**
DUNCAN, ROBERT E., 584
DUVICK, D. N., 570

EARLE, R., JR., 571
EDINGTON, CHARLES W., 570
Escherichia coli, DNA transfer and recombination in, 596
  metabolic and division synchronism, 595
  pleiotropy in, 580
  position effect in, 586
  segregation of selective advantage in ortho-selected, **937**
electron microscopy, lampbrush chromosomes, 579
ELLIS, J. F., 571
EMMERLING, M. H., X-ray and ultraviolet effects, maize chromosomes, **697**
ERK, FRANK C., population competition, *D. melanogaster*, Curly abnormalities and their wild type homologues, **331**
EVERETT, H. L., 571

FABERGÉ, A. C., 571
FARNSWORTH, M. W., 571
FARNSWORTH, P. C., 581
FINGER, I., 572
flax, colchicine induced chimeras, 569
formaldehyde, mutagenic effects of, *D. melanogaster*, 578
FORSTHOEFEL, PAULINUS F., 572
fowl, accessory chromosomes in, 587
  antigen linkage in, 594
  broiler body weight and breast width, 573
  plumage color allelism in species of, **519**
  plumage pattern, quail, in, 578
FUNG, SUI-TONG CHAN, 572, 573

GAITHER, NENITA, 579
  aneuploidy and its role in competition with complete nuclei, *P. aurelia*, **878**
GAMBLE, W. G., 576
gamma-radiation, chronic, and somatic mutation in maize, 595
gamma-ray, chromatid aberrations in air and nitrogen, *T. paludosa*, 193
  ether induced lethals, *D. melanogaster*, 571
  mutation, somatic, carnation, 584
  mutation, *D. melanogaster*, 576
  sensitivity, mouse spermatogenesis, 588
GARBER, E. D., 573
GAREN, ALAN, 596
GARNER, HAROLD R., canavanine effects, *N. crassa*, **721**
gene effects, regional growth, rabbit, 569
gene transfer, *Nicotiana glutinosa* to *N. tabacum*, 567
GILES, N. H., monoepoxides, induced reverse mutations, Neurospora, **890**
GLASS, BENTLEY, induced deficiencies and minutes, oocytes and sperm of *D. melanogaster*, **281**
  induced translocations and inversions, oocytes and sperm of *D. melanogaster*, **252**
GODFREY, GEORGE F., 573
golgi bodies in tissue culture, 583
Gossypium, cytological genome analysis, **214**
  inheritance of yellow-green in, **235**
  linkage in, **903**
GOWEN, JOHN W., 564, 566, 572, 573, 575, 592, 597
GRAF, GERARD E., 573
grasshopper pericentric rearrangements, recombination, **604**
GREEN, M. M., 581
GREENBERG, JOSEPH, resistance to malaria, mice, **620**
guinea pig, temperature effects on coat color, **90**
gynandromorphs in honey bee, 592
Gyrinophilus, mitotic inhibition, chromosome aberration, 568

Habrobracon, differential response in oogenesis to nitrogen mustard, **107**
  dominant lethals induced in, 564
  X-ray induced lethals in, 602
HALL, B. M., interspecific hybrids, Bromus, **175**
HARPSTEAD, D. D., 569
HARVEY, P. H., genetic variances, open pollinated corn, **45**
HAWTHORNE, DONALD C., chromosome mapping, Saccharomyces, **511**
HEILMAN, R. S., 577
HERSKOWITZ, I. H., 574
  chemical mutagenesis, *D. melanogaster*, **76**
heterocaryosis, genetics of, *N. crassa*, **117**
heterosis, honey bee (*Apis mellifera*), 566
  D. pseudoobscura, **832**
HEXTER, WILLIAM M., heterozygote frequencies, Drosophila populations, **444**
HILLMAN, RALPH, 575
HINTON, CLAUDE W., 575
  unstable ring chromosome, *D. melanogaster*, **951**
HINTON, TAYLOR, nutritional requirement, Drosophila, **224**
HOLLANDER, W. F., 575
HOLLOWAY, BRUCE W., genetics of heterocaryosis, *N. crassa*, **117**
HOLMGREN, A. H., cytogenetics, *Agropyron trachycaulum* and *Hordeum jubatum* hybrids, **539**
homeostasis, developmental, natural populations, *D. pseudoobscura*, **797**
  and heterozygosity in time of vaginal opening, mouse, **297**
honeybee, gynandromorphs, 592
  heterosis in, 566
Hordeum jubatum and *Agropyron trachycaulum* hybrids, cytogenetics of, **539**
HORNER, T. W., variance components and correlations between relatives, symmetrical random mating populations, **310**
HOUSE, VERL L., 576
HUESTIS, R. R., 576
hybrids, interspecific, Bromus, **175**

immunochemical studies, Neurospora, 600
incompatibility, autotetraploid white clover, dominance and double reduction, **137**
inheritance, non-Mendelian, Chlamydomonas, 594
interaction, luxoid-luxate, mice, 572
inviability and selection in population cages, 586
IRWIN, M. R., 598
isoalleles, yellow locus, *D. melanogaster*, **374**
IVES, P. T., 571, 576, 577

JAMES, ALLEN P., 577
  radiation-induced genetic segregation, diploid yeast, **826**
  sectoring, ultraviolet induced, yeast, **204**
JANICK, JULES, genetics of monoecism in spinach, **429**
JAY, GEORGE E., resistance to malaria, mice, **620**
JENKINS, J. A., 577
  carotenoids, apricot tomato and its hybrids with yellow and tangerine, **715**
JOACHIM, GERTRUD S., 577
JUDD, BURKE H., V-type position effect, white locus, *D. melanogaster*, **739**

KALTER, H., 578
KAPLAN, W.D., 577
KEMPTHORNE, OSCAR, correlations between relatives, inbred populations, **681**

correlations between relatives in random mating populations, **153**
correlation between relatives, simple autotetraploid population, **168**
variance components and correlations between relatives, symmetrical random mating populations, **310**
killer trait, *P. aurelia*, modified action of *k* in, 567
KIMBALL, E., 578
KIMBALL, R. F., 579
aneuploidy and its role in competition with complete nuclei, *P. aurelia*, **878**
KING, R. C., thermal neutron induced sex-linked lethals, *D. melanogaster*, **490**
KIRBY-SMITH, J. S., 568, 579
KODANI, MASUO, position effects, cubitus interruptus, *D. melanogaster*, **343**
KØLMARK, G., monoepoxides, induced reverse mutations, Neurospora, **890**
KRAMER, H. H., translocations, maize chromosome 4, **500**
translocations, maize chromosome 6, **531**

LAFONTAINE, JEAN, 579
LAUGHNAN, JOHN R., 580
LEDERBERG, ESTHER M., 580
LEDERBERG, JOSHUA, 581
LEE-WHITING, BRENDA, radiation-induced genetic segregation, diploid yeast, **826**
LEFEVRE, G., JR., 581
isoalleles, yellow locus, *D. melanogaster*, **374**
LESLEY, J. W., 581
LESLEY, MARGARET M., 581
lethal dose, gamma radiation, *D. melanogaster*, 577
lethals, heterozygous effects, yeast, 577
induced, dominant, delayed expression, Habrobracon, 564
induced, irradiation, *D. melanogaster*, 570
induced, irradiation, origin of, 589
LEVENE, HOWARD, developmental homeostasis, natural populations, *D. pseudoobscura*, **797**
LEVINE, ELIZABETH E., variable crossing over, *D. pseudoobscura*, **399**
LEVINE, LOUIS, heterosis, *D. pseudoobscura*, **832**
LEVINE, MYRON, 582
LEVINE, R. P., 582
variable crossing over, *D. pseudoobscura*, **399**
LEWIS, HERMAN W., 582
LIEB, M., 583
Lilium formosanum, chiasmata and crossing over in, **850**
LINDEGREN, C. C., 583
LINDEGREN, G., 583
LINDSLEY, DAN L., spermatogonial exchange, X and Y chromosomes, *D. melanogaster*, **24**
linkage, Mormoniella, 602
tomato, 565
LIVINGSTON, C., 603
LOCKHART, WILLIAM R., canavanine effects, *N. crassa*, **721**
LOESCH, P. J., 571
LONGLEY, A. E., translocations, maize chromosome 4, **500**
translocations, maize chromosome 6, **531**

MACKINNEY, G., 577
carotenoids, apricot tomato and its hybrids with yellow and tangerine, **715**
maize, anthocyanin synthesis, 568
chiasmata in a pericentric inversion in, **874**
chromosome aberrations in, 571
dosage effect on mutability in, 589
gamma-radiation, chronic, and somatic mutation in, 595
genetic variances, open pollinated, **45**
intrachromosomal association in A^b complexes, 580
mutable system in, 570
mutation of *yg*$_2$, 594
pollen sterile, fertility restoration in, 570, 571
"reversed germ" in, 577
translocations, chromosome 4 of, **500**
translocations, chromosome 6 of, **531**
vivipary in, **745**
X-ray and ultraviolet effects on chromosomes of, **697**
man, facio-jaw morphogenesis, 590
MANGELSDORF, PAUL C., George Harrison Shull, **1**
MARTIN, A., JR., 583
MARTIN, W. B., JR., 565
maternal influence, induced anomalies, mice, 578
rat body weight, 564
mating type potentialities, *Tetrahymena pyriformis*, 587, **668**
MCCOLLUM, G. D., 598
MCCORQUODALE, D. JAMES, 584
MCDONALD, DANIEL J., segregation of selective advantage in orthoselected *E. coli*, **937**
MCMASTER, R. D., 600
medaka (*Oryzias latipes*), induced sex-reversals of males, **406**
MEHLQUIST, GUSTAV A. L., 584
MELECHEN, NORMAN E., 584
MENZEL, MARGARET Y., cytological genome analysis in Gossypium, **214**
MERICLE, L. W., 585
metabolic and division synchronism in *E. coli* and *Bacillus megaterium*, 595
MEYER, HELEN U., 585, 587
MICKEY, GEORGE H., 585
micronuclear mutations, evidence against, as sole basis for death in *P. aurelia*, **61**
mildew (*Erysiphe graminis hordei*), resistance to, in barley, **421**
MILLER, W. J., 586, 599
MINSAVAGE, E. J., 569, 595
MINUTES, effect on development, *D. melanogaster*, 571
MITCHISON, N. A., basis for death of aged and ultraviolet irradiated, *P. aurelia*, **61**
mitotic inhibition, chromosome aberration, in salamander (Gyrinophilus), 568
monoepoxides, reverse mutations induced by, Neurospora, **890**
MOREE, RAY, 586
MOREJOHN, G. VICTOR, plumage color, fowl, **519**
MORLEY, F. H. W., pericentric rearrangements, recombination, grasshopper, **604**
Mormoniella, linkage in, 602
MORSE, M. L., 586

mouse, body size genetics, 566
gamma-ray sensitivity in spermatogenesis, 588
Harding-Passey melanoma as genetic bio-indicator in, 602
homeostasis and heterozygosity in time of vaginal opening in, **297**
linkage in, **627**
luxoid-luxate interaction, 572
maternal influence on induced anomalies, 578
resistance to malaria in, **620**
resistance to Salmonella in, 597
sire influence on sex ratio in, 601
sperm, X-ray induced dominant lethals in, 575
testis, X-radiation of, 564
MUKAI, FRANK, nuclear distribution, Neurospora heterokaryons, **438**
MULLER, H. J., 587
mutable system in maize, 570
mutation patterns, Scenedesmus (alga), 566
mutation rate, non-effect of photo-reactivating light, *D. melanogaster*, 563
mutations, micronuclear, evidence against, basis for death of aged, and ultraviolet irradiated, *P. aurelia*, **61**

NADEL, ELI M., resistance to malaria, mice, **620**
NANNEY, D. L., 587
mating type potentialities, *Tetrahymena pyriformis*, **668**
nuclear instability, Tetrahymena, **388**
neurological effects, head-mutant, *D. melanogaster*, 575
Neurospora crassa, canavanine effects on, **721**
carbohydrate and nitrogen metabolism interaction in, 599
genetics of heterocaryosis in, **117**
immunochemical studies in, 600
monoepoxides, induced reverse mutations in, **890**
non-allelic suppressor genes in, 602
tryptophan synthetase formation in, **761**
dominance relations in heterokaryons, 590
nuclear distribution in heterokaryons of, **438**
Q locus in, 599
X-ray survival curves, 563
neutrons, thermal, induced sex-linked lethals, *D. melanogaster*, **490**
and X-rays, chromosome sensitivity in Trillium, **460**
NEWCOMER, EARL H., 587
Nicotiana, *glutinosa* and *tabacum*, gene transfer, 567
NILAN, R. A., 588
nitrogen mustard, differential response in oogenesis, Habrobracon, **107**
nuclear distribution, Neurospora heterokaryons, **438**
nuclear instability, Tetrahymena, **388**
nucleic acid metabolism, salivary glands, *D. melanogaster*, 600
nucleus-cytoplasm interaction, 591
nutritional requirement in Drosophila, **224**

OAKBERG, E. F., 588
OBER, DOROTHY, 588
Orthoptera, interspecific variation in, 593
OSTER, I. I., 588
chromosome reunion, X-irradiated Drosophila sperm, **692**
oxygen, action in chromosome aberration, 568

Paramecium aurelia, aging effects in, 596
amino acids of, 565
aneuploidy, 579
aneuploidy and competition with complete nuclei in, **878**
basis for death of aged and ultraviolet irradiated, **61**
ciliary antigens in, 572
modified action of *k*, 567
specific serotype mutants in, 591
variety 1, mating types in, **321**
PARKER, D. R., 589
PAVLOVSKY, O., deleterious recessives, *D. pseudoobscura* populations, **781**
PELC, S. R., 578
Peromyscus, spherocytosis in, 576
PETERSON, PETER A., 589
PHELPS, V. R., 585
PHILLIPS, MARCIA M., tetraploid segregation, Saccharomyces, **546**
pigment analysis, gonadal, *D. melanogaster*, 573
pigment induction, gonadal, *D. melanogaster*, 572
PITTENGER, THAD H., 563, 590
PLAINE, HENRY L., oxygen and hydrogen peroxide effects on a gene and tumor induction, *D. melanogaster*, **268**
pleiotropy, *E. coli*, 580
PLOUGH, H. H., 577
plumage pattern, quail, in fowl, 578
Pneumococcus, factors affecting transformation in, 591
population, autotetraploid, correlation between relatives, **168**
deleterious recessives in, *D. pseudoobscura*, **781**
inbred, correlations between relatives in, **681**
random mating, correlations between relatives, **153**
symmetrical random mating, variance components and correlations between relatives in, **310**
position effect, brown-dominant, *D. melanogaster*, **246**
brown locus, *D. melanogaster*, **5**
cubitus interruptus, *D. melanogaster*, **343**
D. melanogaster, 567, 585
E. coli, 586
V-type, white locus, *D. melanogaster*, **739**
POULSON, D. F., 590
PRICE, SAM, irradiation and interspecific hybridization, Secale, **651**
pseudoalleles, A^b complex in maize, 580

quadrivalents and interchange complexes, *Sorghum purpureo-sericeum*, 573

rabbit, blood group factors in, **770**
gene effects on regional growth, 569
RABKIN, SAMUEL, 590
rat, maternal influence in, 564
RAVIN, A. W., 591
REBHUN, L. I., 591
reduction, double, and dominance, incompatibility in autotetraploid white clover, **137**
REISNER, A., 591
RHYNE, CLAUDE L., genetics of yellow-green, cotton, **235**
ring-X chromosome, *D. melanogaster*, 575
RIS, HANS, 579
RIZKI, M. T. M., 592
genetic modification of temperature sensitive lethal, *D. willistoni*, **130**
ROBERTSON, DONALD S., vivipary, maize, **745**
ROBINSON, H. F., genetic variances, open pollinated corn, **45**
ROMAN, H., 592
tetraploid segregation, Saccharomyces, **546**
ROSS, J. G., 569
ROTHENBUHLER, WALTER C., 592
RUDKIN, G. T., 593
RYAN, FRANCIS J., spontaneous mutations, non-dividing bacteria, **726**

Saccharomyces cerevisiae, radiation-induced genetic segregation, diploid, **826**
chromosome mapping in, **511**
tetrad analysis in, 583
SAEZ, F. A., 593
SAGAWA, YONEO, 584
SAGER, RUTH, 594
genetics of *Chlamydomonas reinhardi*, **476**
ST. LAWRENCE, PATRICIA, 599
salivary gland chromosomes, ultraviolet absorption, *D. melanogaster*, 593
Salmonella, "phenotypic" transductions in, 581
resistance, mice, 597
typhimurium, lysogenicity and immunity in, 583
lysogeny, 582
SANDS, STANLEY M., tetraploid segregation, Saccharomyces, **546**
SAWIN, P. B., 569
Scenedesmus, mutation patterns in, 566
SCHALET, A., 594
SCHALLER, C. W., resistance to mildew, Black Russian barley, **421**
SCHEINBERG, S. L., 594
SCHNELLER, MYRTLE V., 596
SCHUELLEIN, ROBERT J., BROTHER, 597
SCHWARTZ, D., 594
SCOTT, D. McN., 569, 595
SCOTT, J. P., 595
SEARS, E. R., 595
Secale, irradiation and interspecific hybridization in, **651**
sex ratio in mice, influence of sire on, 601
sex-reversal, induced, male medaka, **406**
sexual receptivity selection, turkeys, 596
SHULL, GEORGE HARRISON, biography of, **1**
SHULT, E., 583
SINGLETON, W. R., 595
SKAAR, P. D., 596
SLATIS, HERMAN M., position effect, brown locus, *D. melanogaster*, **5, 246**
SMYTH, J. ROBERT, JR., 596
SOLARI, C. L., 593
SONNENBLICK, B. P., 597
SONNEBORN, T. M., 596
Sorghum purpureo-sericeum, quadrivalents and interchange complexes in, 573
SPARROW, A. H., chromosome sensitivity to X-ray and thermal neutrons, *Trillium erectum*, **460**
SPASSKY, B., deleterious recessives, *D. pseudoobscura* populations, **781**
SPASSKY, N., deleterious recessives, *D. pseudoobscura* populations, **781**
sperm utilization, mustard treated, Drosophila, 594
spermatogonial exchange, X and Y chromosomes in *D. melanogaster*, **24**
spherocytosis, Peromyscus, 576
SPIESS, ELIOT B., 597
spinach, genetics of monoecism in, **429**
STADLER, JANICE, 597
STEBBINS, G. L., 598
STEFFENSEN, DALE, 598
STEPHENS, S. G., linkage, Upland cotton, **903**
sterility, induced, Dactylis hybrids, 598
STERN, CURT, position effects, cubitus interruptus, *D. melanogaster*, **343**
STEVENSON, E. C., genetics of monoecism in spinach, **429**
STIMPFLING, J. H., 598
STOCKER, BRUCE, 581
STONE, W. H., 586, 599
STRAUSS, BERNARD S., 599
Streptopelia, chromosome homology in species of, 598
STURTEVANT, F. M., 600
suppressor genes, non-allelic, Neurospora, 602
SUSKIND, S. R., 600
SWANSON, C. P., ionizing radiations, chromatid aberrations in air and nitrogen, *Tradescantia paludosa*, **193**

TAYLOR, J. H., 600
TEFANKJIAN, A., mating type potentialities, *Tetrahymena pyriformis*, **668**
temperature effect, coat color in guinea pig, **90**
cubitus interruptus, *D. melanogaster*, 576
sensitive lethal, genetic modification of, in *D. willistoni*, **130**
tetrad analysis, Saccharomyces, 583
Tetrahymena pyriformis, mating type in, 587
mating type potentialities in, **668**
nuclear instability in, **388**
thresholds, genetic analysis of, 595
tomato, carotenoids, apricot, 577
carotenoids, apricot variety and its hybrids with yellow and tangerine, **715**
linkage in, 565
X-ray and beta-ray seed treatment, 581
TOSTESON, C. G., 569
Tradescantia, chromatid abberrations, 563
induced chromosome aberrations in, 579
microspores, low intensity X-rays, 564
paludosa, ionizing radiations, chromatid aberrations in air and nitrogen, **193**

metal ions, calcium deficiency and chromosomal aberration, 598
transductions, "phenotypic," Salmonella, 581
Trillium erectum, chromosome sensitivity to X-ray and thermal neutrons, **460**
Triticum, induced gene transfer to, from Aegilops, 595
tryptophan synthetase formation, *N. crassa*, **761**
TSAI, L. S., 601
turkey, sexual receptivity selection in, 596
tyrosinase, *D. melanogaster*, 582

ultraviolet absorption, salivary chromosomes, *D. melanogaster*, 593
and antimetabolite synergism in *D. melanogaster*, 585
chromosome aberrations, Tradescantia, 579
induced genetic segregation, diploid yeast, **826**
and X-ray effects, maize chromosomes, **697**
urethane mutagenicity, *D. melanogaster*, 588

variance, components of, and correlations between relatives, symmetrical random mating populations, **310**
genetic, open pollinated corn, **45**
Vicia faba, effects of imidazole compounds on, 584
vivipary, maize, **745**
VON BORSTEL, R. C., 564
differential response of meiotic stages to nitrogen mustard, Habrobracon, **107**

WEIR, J. A., 601
WELSHONS, W. J., 601
crossing over, attached-X chromosomes, *D. melanogaster*, **918**
WHEELER, A. C., 585
WHITE, M. J. D., pericentric rearrangements and recombination, grasshopper, **604**
WHITING, A. R., 564, 602
WHITING, P. W., 602
WOLFF, G. L., 602
temperature effects, coat color in guinea pig, **90**
WOOD, EUNICE M., thermal neutron induced sex-linked lethals, *D. melanogaster*, **490**

X-irradiated barley seed, storage effect, 588
X-radiation, chromosome reunion, Drosophila sperm, **692**
interspecific hybridization, Secale, **651**
mouse testis, cytology, 564
X-ray and beta-ray treatment, tomato seed, **581**
chromatid aberrations in air and nitrogen, *T. paludosa*, **193**
diagnosis and ovary dose, 597
dose-effect, barley embryo, 585
induced deficiencies and minutes, oocytes and sperm, *D. melanogaster*, **281**
induced lethals, dominant, mouse, 575
Habrobracon, 602
induced reverse mutation, 581
induced translocations and inversions, oocytes and sperm, *D. melanogaster*, **252**
injury, protection from by hydration, 565
low intensity, chromosomal aberrations, Tradescantia microspores, 564
oxygen and hydrogen peroxide effects on a gene and tumor induction, *D. melanogaster*, **268**
rate and chromosomal rearrangements, *D. melanogaster*, 574
survival curves, Neurospora, 563
and ultraviolet effects, maize chromosomes, **697**
and thermal neutron sensitivity in Trillium chromosomes, **460**

YAMAMOTO, TOKI-O, induced sex-reversal, male medaka (*Oryzias latipes*), **406**
YANOFSKY, C., 600, 602
tryptophan synthetase formation, *N. crassa*, **761**
yeast, heterozygous effects of lethals in, 577
mutation in, 592
mutants, adenine synthesis, 592
sectoring, ultraviolet-induced, **204**
tetraploid segregation in, **546**
YERGANIAN, G., 603
YOON, CHAI H., homeostasis and heterozygosity in time of vaginal opening, mouse, **297**

ZIMMERING, STANLEY, genetic segregation, Drosophila translocation heterozygote, **809**
ZOHARY, DANIEL, chiasmata and crossing over, *Lilium formosanum*, **850**
chiasmata in a pericentric inversion, maize, **874**
